

goldenCall

Private and secure calls

Are you worried about your privacy?

We offer you the possibility to anonymize and secure your calls

- **Your phone calls** from any location are neither traceable nor detectable
- **Private or professional** calls are encrypted and it is impossible to decode their content

*There is **no direct link between the caller and the callee**. The use of multiple security levels make fruitless any attempt at listening on potential criminals. Calls are anonymous, **it is impossible to detect who you 're calling**.*

- **Discuss discreetly**, goldenCall offers new secret identity to you and your audience

*You have many contacts and you do not want anyone to identify who you are calling
With goldenCall your calls are anonymous and you can assign a pseudonym to contacts*

- **Manage** your contacts within closed private groups
- **You decide** which contacts in the group are allowed to converse with each other

You can allow some members to contact others, they will have access to assigned pseudonyms. Members of a group are 'hidden' from each other and people are not aware of the existence of the other contacts.

- You may belong to several groups and have different pseudonyms

Security

We care about the privacy of your data; we devised an ultra-secure solution developed and tested internally, in Geneva. goldenCall is designed for international use. *This product is intended for private clients.*

Benefits

- ✓ Keeps the anonymity of places and people called
- ✓ Preserves the confidentiality of the content of your communications
- ✓ Brings benefit of a dedicated and secure server
