

goldenFeed

*Automated Data Processing Tool
High Tech Solution*

“Information must be available any time, anywhere.”

Simplify and automate the collection and processing of your data in order to ensure their consistency, accuracy and safety.

Do more, faster

goldenFeed is an automated data processing tool, dedicated to helping you control and manage your data. goldenFeed allows you to optimize your productivity, secure your business information and reduce your risks and costs.

Stay competitive

goldenFeed automates and simplifies the processing of your financial and accounting data while reducing risks inherent in manual data entry. This exclusive solution allows you to optimize your business processes and to reduce your operational costs.

Maximize your opportunities

goldenFeed collects, processes and distributes all your data (electronic or paper) through a process automation, giving you immediate access to a world of information directly integrated into your software -accounting, financial, back-office, PMS, etc.

Operate safely

goldenFeed helps you to anonymize sensitive and confidential data by using an intelligent recognition feature. It also performs the whole data processing in a safe and secure environment.
